

Danish Shabbir

Junior Android App Developer | Kotlin | XML + Jetpack Compose | SQL Server | FastApi

+92-3020058872 | danishshabbir110@gmail.com | Rawalpindi, Pakistan

PROFESSIONAL SUMMARY

Software Developer with experience in Android application development, backend development, API integration, and database management. Built MEye-Pro, an academic management system featuring timetable scheduling and automated attendance tracking using Kotlin, XML, FastAPI, and SQL. Strong understanding of software development principles, problem-solving, testing, and debugging. Eager to contribute technical skills and grow as a software engineer.

TECHNICAL SKILLS

Frontend: Kotlin, XML, Jetpack Compose, Room Database, Firebase, MVVM Architecture, API Integration

Backend: ASP.NET Web API, FastAPI Python, REST API Design, Authentication & Authorization

Database: Microsoft SQL Server, CRUD Operations, Joins, Subqueries, Stored Procedures, Query Optimization, Constraints

Languages: C#, Kotlin, SQL, C++, Python

Tools: Android Studio, Git & GitHub, Postman, Visual Studio, VS Code, Google Maps API

PROJECTS

MEye-Pro With Timetable & Attendance | [Final Year Project](#) | [Kotlin+Xml](#) · [Fast API](#) · [SQL Server](#)

Developed the Android mobile application using Kotlin and XML for an AI-powered security and monitoring system that utilizes facial recognition through cameras for identity verification and attendance monitoring.

- Collaborated in a team of four developers, working with different technologies while integrating with a shared FastAPI backend and SQL database.
- Implemented mobile features, API integration, secure data communication, user authentication, and real-time data management to support system operations.
- Key Technologies:** Kotlin, XML, FastAPI, Python, SQL Database, REST APIs, Facial Recognition Integration, Android Development.

AI-Powered ATS CV Builder App | [Kotlin](#) · [Jetpack Compose](#) · [Firebase Authentication](#) · [MVVM](#)

- Developed an **AI-powered ATS CV Builder** Android application using **Kotlin** and **Jetpack Compose**, enabling users to generate professionally formatted, ATS-optimized resumes through **Google Gemini AI API** integration.
- Implemented **Firebase Authentication** and **Firestore Database** for secure user management and real-time data storage.
- Applied the **MVVM architecture pattern** and **StateFlow** for efficient state management and scalable application design.
- Built features including personal information management, education and experience tracking, skills management, CV preview, and PDF export functionality.

Smart Expense Tracker App | [Kotlin](#) · [XML](#) · [Room Database](#)

- Developed a **personal finance and expense tracking application** featuring real-time analytics and data visualization using **MPAndroidChart** to display expense trends and category-wise spending distributions.
- Implemented **Room Database (SQLite)** for efficient offline data storage, retrieval, and CRUD operations.
- Focused on performance optimization, data persistence, and seamless user experience across the application.

Mini Task Tracker Application | [Kotlin](#) · [XML](#) · [ASP.NET Web API](#)

- Developed an Android application using **Kotlin and XML**, integrated with a **.NET Framework RESTful API** for backend communication and data management.
- Implemented **Room Database (SQLite)** for offline task storage, local data persistence, and seamless CRUD operations, ensuring reliable performance in both online and offline environments.

EDUCATION

Bachelor of Computer Science **2022-2026**

Barani Institute of Information Technology, Rawalpindi

KEY COMPETENCIES

Architecture: Android App Development, RESTful API Design, Role-Based Access Control (RBAC), State-Driven UI Logic.

AI: Computer Vision, OpenCV, Face-Recognition, Pose Estimation, YOLO-v8.

Backend: Asynchronous Request Handling, Timetable Scheduling Logic, Error Handling, API Response Management.

Database: Complex Joins & Subqueries, Aggregate Functions, GROUP BY / HAVING, Indexing, Relational Schema Design, High Dimension Vector Storage.

Languages: English, Urdu
